Additional Details

Seeking a career as a front-end web developer. I am very ambitious to upgrade my skills and start working on real projects together with a team of professionals to gain work experience.

Answers to the questions:

- What programming languages have you studied so far and where?

JavaScript, HTML, CSS and React framework self-taught on my own with the help of a friend who has 10+ years experience.

- Do you have any practical programming experience?

Yes

- What is the programming language you are most familiar with?

JavaScript using React framework

- Are there programming languages that you would prefer to work with? If yes, which are they and why do you like them more?

JavaScript, because it is the one i know the best.

- Among the commonly used programming languages (Java, C#, JavaScript, Python, etc.) is there any that you would rather not work with? If yes, why not?

No

- Are you able to work full-time?

Yes

Desired job: Intern/Junior web development with JavaScript using React framework.
